

CPRE Factsheet

Requirements Engineering
Expert | Level 4

Prove your in-depth and cross-functional expertise

Target group

Specialists in the areas of RE, business analysis, business engineering, software architecture and system development with practical RE experience.

Prerequisites

Minimum of two CPRE Specialist / Advanced Level certificates. One certificate can be replaced by another RE qualification or publication and at least 3 years (full-time equivalent) experience as a requirements engineer in various functions and projects.

The CPRE Expert certificate certifies:

- comprehensive and cross-functional knowledge in RE, covering all theoretical and practical aspects
- the analytical competence to competently and thoroughly assess complex situations in RE
- can appropriately select and apply the most suitable methods and techniques of Requirements Engineering to the situation

Exam

The examination consists of two parts:

- Part 1: written application
- Part 2: oral examination
