

Professionalize your RE practice in agile environments

Target group

People from RE, business analysis, software- and system development as well as roles from the agile community (product owner, product manager, scrum master, release train engineer, system architect/engineer, business owner, developer), who want to deepen their knowledge in dealing with requirements in agile environments.

Prerequisites

CPRE Foundation certificate or BCS Practitioner certificate in RE or selected PO certificates ([see exam regulations](#))

The module provides comprehensive knowledge and skills:

- successfully plan, implement and perform RE techniques and methods in agile projects
- successfully plan, implement and perform techniques and methods from agile approaches in RE
- combine Agile approaches and RE techniques to the benefit of all stakeholders
- correctly use the terminology of RE in an Agile context

Exam

75-minute multiple-choice test with approx. 45 questions

Languages

DE, EN, PT (BR)
