

## Show that you can apply your professional knowledge

### Target group

All CPRE Practitioners who want to demonstrate their comprehensive theoretical and practical knowledge, as well as their competencies, in a specific area of Requirements Engineering – whether it's elicitation, management, modeling, or in agile environments.

### Prerequisites

The corresponding CPRE Practitioner certificate at level 2

### The CPRE Specialist certificate certifies:

- the ability to actively select, apply, and evaluate the appropriate RE techniques and methods
- advanced practical and theoretical skills in one of the following modules:
  - Requirements Elicitation
  - Requirements Management
  - Requirements Modelling
  - RE in agile environments (RE@Agile)

### Exam

Written assignment to demonstrate competence in selecting, applying, and evaluating appropriate RE techniques and methods in the context of one's own working environment.

### Languages

DE, EN
